DETAILED ACTION

Applicant's amendment filed on 5/18/07 was entered.

Amended claims 16-17, 52 and new claims 75-104 are pending in the present application. Applicants elected previously the following species: (a) prostate cancer cells as the species of transfected cells; (b) cytomegalovirus promoter as the species of promoter; and (c) an adeno-associated virus vector as the species of recombinant viral vector. In light of the new set of new claims, additional species restriction is required below.

Species Election/Restrictions

This application contains claims directed to the following patentably distinct species:

A single specific named parenteral administration recited in the Markush group of claim 84 or claim 99.

The species are independent or distinct because each of the recited parenteral administration routes is distinct physically one from the others, and each would require different technical considerations to achieve the desired therapeutic effects.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 16, 83-84, 52, 98-99 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1633

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
